Pune, Maharashtra | radhyeshyamlahoti7@gmail.com | +91 8080788806 | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Third-year Computer Engineering (AI) student at VIT Pune with hands-on experience across full-stack development and applied machine learning, ML pipelines, and security scanning and AI-driven support tools. Seeking a Software Developer, Full-Stack Developer, or AI/ML internship.

EDUCATION

Vishwakarma Institute of Technology, Bibwewadi, Pune

2024 – 2028

B.Tech in Computer Engineering (Artificial Intelligence) | CGPA: 9.44 / 10.0

EXTRA-CURRICULAR & LEADERSHIP

Content & Research Coordinator — Ekasutram – The Mathematics Club

Aug 2025 – May 2026

- Researched and authored technically accurate mathematics content for club publications, workshops, and outreach events, strengthening the club's educational resources.
- Simplified advanced mathematical concepts into accessible, engaging material, contributing to improved student participation and the club's academic reputation.

Content & Research Volunteer — Ekasutram – The Mathematics Club

Oct 2024 – May 2025

- Volunteered as a content and research contributor, supporting the creation of mathematics learning material for club workshops and outreach initiatives.
- Collaborated with fellow club members to coordinate content planning and research efforts, contributing to the smoother execution of club publications and events.

PROJECTS

[AI-Based Cyber Vulnerability Analysis of Codebase](#) — Industry Project, Passion Infotech

2026

Tech: Python, Flask, GitPython, Bandit, Semgrep, HTML/CSS/JS, Bootstrap

- Engineered a Flask-based SAST web application, integrating Bandit and Semgrep with a GitPython-driven scanning workflow to clone repositories, automate security analysis, and categorize vulnerabilities by severity.
- Built a responsive Bootstrap dashboard to manage repository scans, visualize security findings, and generate structured vulnerability reports for efficient code review and remediation.

[AURA AI — AI-Based Mental Health Support System](#)

2026

Tech: Python, LLMs, NLP, React

- Developed AURA AI, an AI-based mental health support system in Python that applies LLMs and NLP to interpret user input and generate context-aware, empathetic responses.
- Designed the system to prioritize accessibility and ease of use, enabling users to access guided, personalized mental health support through a simple conversational interface.

SKILLS & TECHNOLOGIES

Programming: Python, JavaScript, TypeScript, C++, C, HTML5, CSS3

AI/ML: Scikit-learn, NumPy, XGBoost, Random Forest, SHAP, K-Means Clustering, OpenCV, Matplotlib, Seaborn

Web Development: React, Flask, Bootstrap, Streamlit

Databases & backend: MySQL, MongoDB, Node.js, Express.js

Tools & Platforms: Git, GitHub, GitPython, Bandit, Google Colab, Arduino IDE, Vs code

Coursework: Data Structures & Algorithms, DBMS, OOP, OS, Computer Networks, Machine Learning Fundamentals, Deep Learning

Soft Skills: Fluent in English, Hindi, Marathi, Marwadi | Quick Learner | Leadership | Critical Thinking & Problem Solving

CERTIFICATIONS

Introduction to Information Technology and AWS Cloud — Aug 2026

Amazon Web Services, offered through Coursera

Machine Learning Foundations: A Case Study Approach — Apr 2026

University of Washington, via Coursera
